Level 5 Section

3. Paragraphs and blocks

This is a regular paragraph:

This journey begins one late Monday afternoon in Antwerp. Our team desperately needs coffee, but none of us dare open the office door.

To leave means code dismemberment and certain death.

Never do today what you can put off 'til tomorrow.

This is some code:

```
|—— mountall-bootclean.service -> /dev/null
|—— mountall.service -> /dev/null
|—— mountdevsubfs.service -> /dev/null
|—— mountkernfs.service -> /dev/null
|—— mountnfs-bootclean.service -> /dev/null
|—— mountnfs.service -> /dev/null
|—— multi-user.target.wants
|   |—— console-setup.service -> /lib/systemd/system/console-setup.service
|   |—— cron.service -> /lib/systemd/system/cron.service
|   |—— cups-browsed.service -> /lib/systemd/system/cups-browsed.service
|   |—— cups.path -> /lib/systemd/system/cups.path
|   |—— haveged.service -> /etc/systemd/system/haveged.service
|   |—— ModemManager.service -> /lib/systemd/system/ModemManager.service
|   |—— networking.service -> /lib/systemd/system/networking.service
```

```
|—— mountall-bootclean.service -> /dev/null
|—— mountall.service -> /dev/null
|—— mountdevsubfs.service -> /dev/null
|—— mountkernfs.service -> /dev/null
|—— mountnfs-bootclean.service -> /dev/null
|—— mountnfs.service -> /dev/null
|—— multi-user.target.wants
|   |—— console-setup.service -> /lib/systemd/system/console-setup.service
|   |—— cron.service -> /lib/systemd/system/cron.service
|   |—— cups-browsed.service -> /lib/systemd/system/cups-browsed.service
|   |—— cups.path -> /lib/systemd/system/cups.path
|   |—— haveged.service -> /etc/systemd/system/haveged.service
|   |—— ModemManager.service -> /lib/systemd/system/ModemManager.service
|   |—— networking.service -> /lib/systemd/system/networking.service
```

```
require 'asciidoctor' ①
```

```
Asciidoctor.convert_file 'mysample.adoc' ②
```

① Imports the library

② Reads, parses, and converts the file

```
sudo dnf install asciidoc
```

Related information

This is aside text.

It is used to present information related to the main content.

TODO list

- Learn the AsciiDoc syntax
- Install AsciiDoc
- Write my document in AsciiDoc

- The header in AsciiDoc must start with a document title.

```
= Document Title
```

Keep in mind that the header is optional.

- Optional Author and Revision information immediately follows the header title.

```
= Document Title  
Doc Writer <doc.writer@asciidoc.org>  
v1.0, 2013-01-01
```

- The header in AsciiDoc must start with a document title.

Here's an example of a document title:

```
= Document Title
```

NOTE

The header is optional.

1.

```
print("one")
```

2.

```
print("one")
```

Gettysburg Address

Four score and seven years ago our fathers brought forth on this continent a new nation...

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. ...

— Abraham Lincoln, Address delivered at the dedication of the Cemetery at Gettysburg

NOTE

This is an example of an admonition block.

Unlike an admonition paragraph, it may contain any AsciiDoc content. The style can be any one of the admonition labels:

- NOTE
- TIP
- WARNING
- CAUTION
- IMPORTANT

3.1. Hardbreaks

Rubies are red,
Topazes are blue.

Ruby is red.
Java is black.

Rubies are red,
Topazes are blue.

3.2. Punctuation

bold **constrained** & **unconstrained**

italic *constrained* & *unconstrained*

bold italic ***constrained*** & ***unconstrained***

monospace **constrained** & **unconstrained**

monospace bold **constrained** & **unconstrained**

monospace italic *constrained* & *unconstrained*

monospace bold italic ***constrained*** & ***unconstrained***

3.3. Preventing substitution

Stars will appear as **Stars**, not as bold text.

&sect; will appear as an entity, not the § symbol.

`__func__` will appear as *func*, not as emphasized text.

{two-semicolons} will appear ;;, not resolved as ;;

3.4. Links

Chat with other Fedora users in the [Fedora IRC channel](irc://irc.freenode.org/#fedora) [irc://irc.freenode.org/#fedora]

This is an cross reference (or internal link) to the [bottom of the document](#)

3.5. Images

To include an image on its own line (i.e., a block image), use the `image` prefix in front of the file name and square brackets after it:

```
image::sunset.jpg[]
```

If you want to specify alt text, include it inside the square brackets:

```
image::sunset.jpg[Sunset]
```

Figure 1. A mountain sunset
